Labelring

Cosmetics compliance for UK beauty brands, without the paperwork maze.

Brands enter their product data. Labelring checks it against UK and EU cosmetics rules, flags what is missing, and builds the Product Information File.

Rules are spread out

Label, UK and EU rules and safety documents sit in different places.

Gaps show up late

Missing label items are easy to miss until packaging is printed.

Safety steps take time

Finding an assessor or lab and sending complete information is a project.

1. **Enter data**
   Ingredients, claims, packaging, label details.
2. **See gaps**
   Checked against our rulebook.
3. **Revise**
   Brand fixes flagged items.
4. **Get the PIF**
   File assembled from complete data.

Core product

PIF assembly on the platform. Free pilot for first brands.

Planned service

Commission-based referrals to safety assessors and labs.

Pilot: recruiting at least three brands, starting with founder-led brands.
Pilot brands: add number **Products checked:** add number
Raising: add amount and stage
